

VStream – The Windshield That Works

Z2450 VStream® Windshield for K 1200 LT

Replace that late model “short” K 1200 LT windscreen with your new best friend and touring partner – the VStream!

The Z2450 does much more than effectively redirect wind; it allows you to use your communication system with ease and, at the same time, stay warmer on those long late-season rides.

Z2450 H: 21.50" (54.6cm) W: 26.75" (67.9cm)
6.0mm Quantum™ coated Lexan® polycarbonate; Clear

Z2450

Quiet... Comfort... Optics... and Strength!

The VStream® windshields from ZTechnik define the state of the art in motorcycle windshield design and technology.

The unique “V” shape delivers an aero-acoustic riding experience – the greatly reduced wind noise and wind blast mean a more comfortable ride.

Our exclusive Quantum™ hardcoating makes this the most scratch resistant windshield in the world, which means a clearer view of the road ahead.

The VStream is made from Lexan® polycarbonate, the toughest windshield material available. And ZTechnik makes the VStream windshield 6.0mm thick, to go another step further in offering the world’s strongest windshield.

Add Comfort and Luxury to Your Ride

Z9401A Passenger Armrests for K 1200 LT

Brought to you by popular demand – the updated ZTechnik Z9401A Passenger Armrests for the K 1200 LT!

Add comfort, luxury, functionality, and style to your bike. Ergonomically positioned, the armrests rotate rearward for easy passenger dismounting or access to the rear trunk. They are also designed to blend seamlessly with the bodywork for a true OEM look.

The aluminum armrests are precision machined to ensure a perfect fit as well as silky smooth operation at the pivots. The armrests mount to the rear trunk with stainless steel hardware via a hidden backing plate. Installation is easy with do-it-yourself instructions and a mounting template.

ZTechnik determined the optimum position and height of the Z9401A Armrests by field testing with a multitude of body types. This ensures maximum long-distance comfort for your passenger.

The solid mounted hardware lets the armrest rotate smoothly rearward to facilitate passenger dismounting or access to the trunk.

Keep Your Eyes On the Road

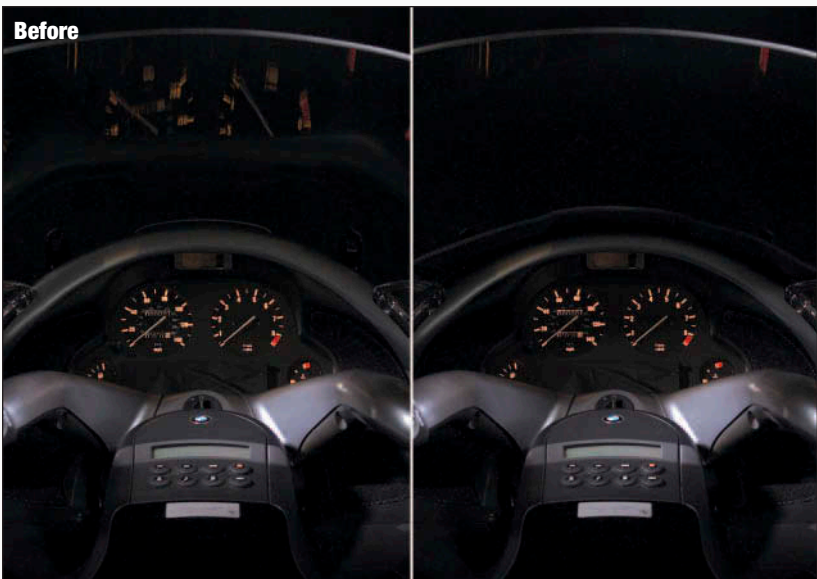

Z7840 Instrument Visor for K 1200 LT

K 1200 LT riders have routinely complained about nighttime reflections from the bike's backlit instruments on their windshield. Conversely, the instrument panel can be difficult to read due to glare caused by bright sunlight.

The ZTechnik Z7840 Instrument Visor addresses both of these issues. The dense thermo-molded visor is finished in a durable and attractive black canvas. Installation is simple and straightforward with industrial grade adhesive strips (included).

Once installed, the Z7840 Instrument Visor blends in with the OEM styling. You won't notice it's there, but you will notice less reflective instrument glare on your windshield.

Let ZTechnik Light Up Your Life

Z5150 Side Illumination Lights for K 1200 LT

ZTechnik Side Illumination Light will greatly enhance nighttime driving. Twin 35-watt halogens provide 160 degrees of illumination. This can help you see a dark driveway entrance, or an animal lurking along a rural road at night.

A handsome switch housing provides convenient activation from the left grip. Lights feature rugged and stylish cast aluminum housings finished in BMW silver powder coat that blends perfectly with the bodywork.

The easily accessible Activation Switch mounts in minutes to your left handlebar controls. A simple push with your thumb lights up the night.

Actual nighttime photos taken from motorcycle with specially constructed camera mount.
