

VStream – The Quietest Windshield Ever

Z2400 VStream® Windshield for R 1100/1150 RT

Z2402 VStream® Windshield for R 1200 RT

ZTechnik takes the R 1100/1150 RT to unprecedented levels of performance. Your riding time on the R-RT will never be the same after you install a VStream windshield. "Wow, what a windshield."

For the R 1200 RT, the Z2402 will be the most versatile wind management accessory you will purchase this year. It's so quiet, even your passenger will be able to hear the radio!

Z2400 H: 17.00" (43.2cm) W: 21.50" (54.6cm)
6.0mm Quantum™ coated Lexan® polycarbonate; Clear

Z2402 H: 26.50" (67.3cm) W: 23.50" (59.7cm)
6.0mm Quantum™ coated Lexan® polycarbonate; Clear

Smooth Laminar Airflow

Z2200 Dolphine™ Windshield for R 1150 RS

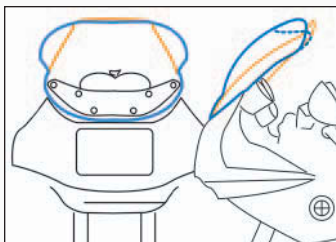

The look is classic. DOLPHINE™. Its aerodynamics deliver a pure laminar flow. Similar to a racing bubble with minimum resistance, it features low turbulence and that means low noise. These aerodynamic enhancements add up to better comfort for both the rider and passenger of the R 1150 RS.

Adjusted up, down or anywhere in between, the Dolphine's large bubble smooths out the air flow and the extra width provides a wider air pocket.

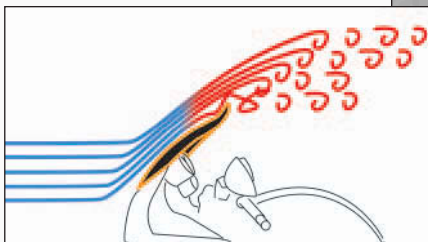

The Dolphine windshield is made from tough 4.5mm Lexan® polycarbonate for excellent optics, impact resistance, and crack resistance. The FMR hardcoat gives you excellent abrasion resistance and long-term quality.

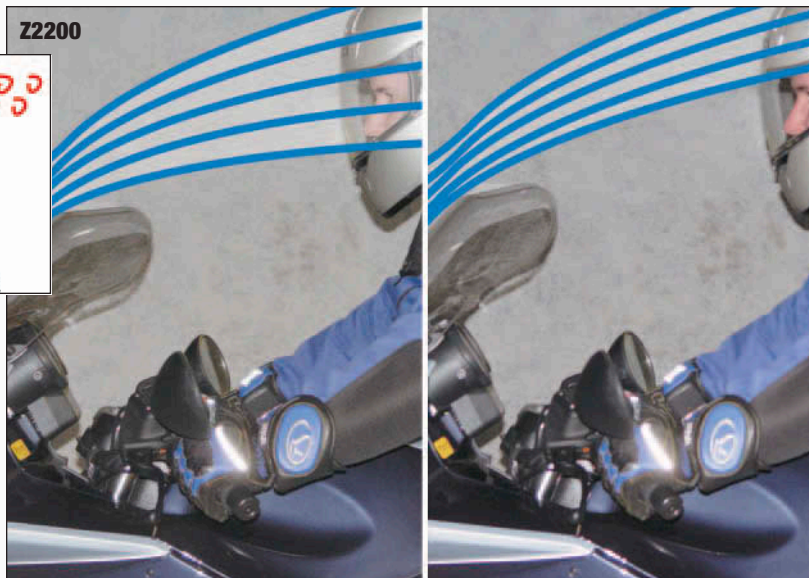

Z2200 H: 13.75" (35.0cm) W: 17.00" (43.2cm)
4.5mm FMR coated Lexan® polycarbonate; Clear

The Dolphine's pushed-out front bubble increases your comfort level. The Dolphine is also wide, giving you good wind protection in rainy or dusty conditions. It makes a great windshield for two-up riding on the R 1150 RS.

The OEM shield (above) produces a turbulent airflow. The Dolphine (at right) produces a smooth, laminar airflow in either the lowered or raised setting.

The ZTechnik Weight Loss Plan

- Z4002** Stainless Steel Eurosport Slip-On Canister
- Z4003** Complete Stainless Steel Exhaust System

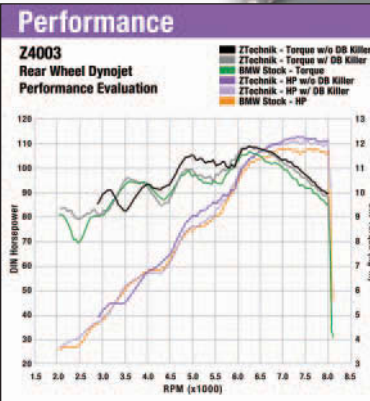

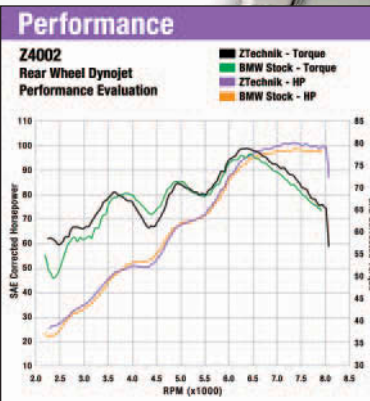

Two new ZTechnik Exhausts are now available for your R 1200 RT.

The Z4003 is a complete exhaust system with stainless steel headers and a polished stainless steel canister, while the Z4002 is the slip-on canister only. Both feature a removeable dB Killer™ baffle. Remove the baffle when you want a more aggressive exhaust note, or leave it in to enjoy the open road sounds when touring.

Whether you choose the Complete Exhaust System or just the Slip-On Canister, you'll appreciate a significant decrease in weight along with a pleasant boost in horsepower and torque.

Needless to say, you'll enjoy a boost in overall appearance as well. The ZTechnik Z4002 and Z4003 are do-it-all systems that incorporates both style and performance.

Your Engine Warranty Remains Valid When You Step Up to a ZTechnik Exhaust System!

The new ZTechnik Z4003 and Z4002 Exhausts features an easily removable "Decibel Killer", giving the rider a choice between stealthy quiet and a healthy growl.

Kick It Up a Notch

Z4000 Stainless Steel Eurosport Slip-On Canister

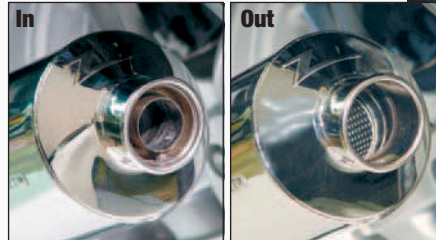

The ZTechnik Z4000 Slip-On enhances the riding experience for the R 1100/1150 RT and RS riders. This exhaust features a polished stainless steel muffler that never requires repacking, and mounts with enough clearance to utilize the stock BMW saddlebags.

Since the Z4000 employs a removable dB Killer™, the system offers the rider a choice between stealthy quiet and a healthy growl.

Experience a weight reduction of 54%, overall better performance, and broader torque. It will put a smile on your face.

The Z4000 Exhaust allows sufficient clearance for mounting the stock saddlebags.

The Z4000's removable dB Killer™ (above).

Your Engine Warranty Remains Valid When You Step Up to a ZTechnik Exhaust System!

...the Real Thing

- Z8500** Carbon Fiber Tank Protector for R 1100/1150 RT/RS
- Z8602** Carbon Fiber Gauge Panel for R 1100/1150 RT
- Z8890** Carbon Fiber Fuel Cap Trim for R 1100/1150 RT/RS

If you like the look of Carbon Fiber, ZTechnik's new trim accessories for the RT and RS won't disappoint you. Genuine carbon fiber cloth comes alive under a crystal clear, poured resin topcoat. And ZTechnik's close attention to precision fit will ensure easy installation onto your bike.

After the carbon fiber piece is cut, a clear resin is carefully applied to produce an even, radiused edge. This edge results in a fluid transition from the carbon fiber piece to the contact surface of the motorcycle at all points.

A pressure sensitive adhesive backing is applied that securely, but safely, attaches the piece to the motorcycle.

See Everything You're Missing

Z5100 Side Illumination Lights for R 1100/1150/1200 RT

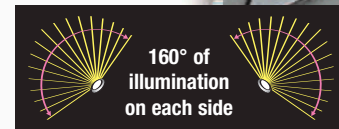

What a difference the ZTechnik Side Illumination Light will make for your nighttime driving. This light illuminates the foreground of the motorcycle so you can see things like your driveway entrance, see better at night in rural areas, or ride with more confidence and safety.

By way of a conveniently located alternate switch mounted to the existing left control, you can switch on the halogen bulbs which pour out 160 degrees of illumination from your motorcycle. The 35-watt halogen bulbs are fired up inside handsome cast aluminum housings that are finished in BMW silver powder coat.

The easily accessible Activation Switch mounts in minutes to your left handlebar controls. A simple push with your thumb lights up the night.

Actual nighttime photos taken from motorcycle with specially constructed camera mount.
